Greetings,

I would like to encourage you to keep the Sawmill Creek Rd and Indian River Bridge Replacement on track to start in 2006.

We need this work done to be done now, it would not be good to put it off until 2009. Unsafe conditions exist at Indian River Bridge and it needs to be replaced before someone gets hurt on it.

Also the sewer line installation is very important health need for Sitka. Raw sewage has/is being discharged onto the ground, and into our waterways along this highway. This needs to stop as soon as possible.

Clyde Bright
